# CARTER & SPENCER GINGER

In 1936 the Carter & Spencer Group commenced business as a fresh produce wholesaler in the Brisbane Markets. Over 85 years of culture, innovation and experience has led to substantial growth and the Carter & Spencer Group is now one of the largest private companies in Australasia. Carter & Spencer is truly the market leader in the provision of fresh products.

Carter & Spencer are one of Australia's leading produce firms within Australia, servicing major customers in Australia, New Zealand and many more countries around the world. With over 85 years' experience we are specialists in fresh produce growing, packing, procurement, logistics, packing, importing, exporting and marketing.

We grow our own ginger on our farms in the Bundaberg region in Queensland. Additionally our Moore Park greenhouse facility consists of 4 greenhouses which cover 12,000m<sup>2</sup> and 38 acres of land for outside farming.

Carter & Spencer can export 2 types of ginger, Queensland Ginger which is very popular in dessert foods and Canton Ginger (also known as Jumbo) which is more savory and frequently used in many Asian and South Asian cuisines. Our ginger varieties are available for export all year round.

We export our Spencer Ranch and supply partner's fresh produce to Singapore, Vietnam, China, Japan, Hong Kong, and many more countries around the world. We have operations in Australia, the USA and New Zealand and can export a large range of fresh fruits and vegetables. We plan on continuing to expand our export sector and provide more fresh produce to the rest of the world.

Ginger is actually a rhizome, not a root. A rhizome is an underground stem.

Ginger has many health benefits, some including anti-inflammatory properties, blood sugar regulation, and gastrointestinal relief.

-since 1936-
